PROFESSIONAL SUMMARY

Frontend Developer with close to 4 years of experience building responsive, scalable, cloud-integrated web applications using React JS, JavaScript (ES6+), HTML5, and CSS3. Improved UI performance by up to 30% through optimized rendering and state management. Experienced in writing unit tests using Jest and React Testing Library to ensure code reliability, conducting code reviews, and delivering 100% on-time sprint releases. Familiar with modular frontend architecture concepts including microfrontends.

Demonstrated strong ability to rapidly acquire new technologies by independently learning Oracle Redwood UI from scratch and delivering production-grade features within project timelines, earning the Infosys Insta Award for ownership and execution excellence. Passionate about creating intuitive, AI-driven user experiences within Agile teams that deliver high-quality, measurable outcomes.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, Material UI (MUI), Responsive Web Design, Accessibility (WCAG), Redwood UI, Redux Toolkit
Tools	Git, Visual Studio Code, GitHub Copilot, Browser DevTools, Microsoft Copilot Studio, Oracle Visual Builder Studio (VBS)
Testing	Jest, React Testing Library (Unit Testing & Component Testing)
Methodologies	Agile (Scrum/Kanban), Sprint Planning, Retrospectives, Code Reviews
Architecture	Component-Driven Design, Reusable Component Libraries, Microfrontend Architecture (Conceptual)

WORK EXPERIENCE

Associate Consultant, Infosys Ltd.	Jan 2026 – Present
- Participated in Microsoft Copilot Innovation Jam, developing a knowledge agent using Microsoft Copilot Studio and prompt engineering, enabling automated information retrieval and improving team productivity. - Customized and optimized CSS for SharePoint applications using parent-child node hierarchy patterns, improving UI consistency and reducing style override conflicts by 40%. - Spearheaded GitHub Copilot integration training for junior developers, demonstrating AI-assisted coding workflows that increased development velocity by 25% and improved code quality. - Mentored team members on project migration best practices across UAT, Pre-Production, and Production environments, ensuring zero-downtime deployments and seamless environment transitions.	
Senior Systems Engineer, Infosys Ltd.	Oct 2024 – Dec 2025
- Developed and maintained responsive, cloud-integrated web interfaces using React JS and JavaScript (ES6+), targeting scalable and modular UI architecture. - Integrated RESTful backend APIs with secure authentication patterns, improving data flow efficiency and understanding API design principles. - Optimized data workflows using custom hooks and React patterns, reducing re-renders by 35% and increasing component efficiency. - Wrote unit tests using Jest and React Testing Library for critical UI components, improving test coverage and reducing post-release defects.	

- Worked with UI migration to Oracle Redwood standards in Visual Builder Studio integrated with Oracle CX.
- Conducted code reviews that reduced post-release defects by 15%.
- Delivered 100% of sprint deliverables on schedule across multiple Agile cycles.

Systems Engineer, Infosys Ltd.

Jul 2022 – Sep 2024

- Built enterprise web UIs using React Hooks, reducing UI response time by 20%.
- Implemented debounced search and pagination using custom hooks to optimize API usage and UI performance, integrating with backend services.
- Integrated RESTful APIs securely, ensuring reliable data flow, validation, and secure authentication patterns.
- Built authentication, dashboards, and CRUD flows that improved task completion efficiency by 25%.
- Authored unit tests using Jest and React Testing Library, ensuring component-level reliability and catching regressions early.

PROJECT HIGHLIGHTS

Property Management – Frontend React Development

- Improved UI modules for property management using React JS and RESTful APIs.
- Built secure, reusable UI components and dashboards with interactive visualizations.
- Delivered defect-free releases and received recognition for collaboration and code quality.

Agile Retrospective Tool – React-based SPA

- Built a React-based tool enabling Scrum teams to streamline retrospectives with real-time form interactions.
- Developed secure authentication and state management modules with 99% error-free submissions.
- Delivered all features within sprint timelines with 100% functional accuracy.

Training Portal – Responsive Frontend UI

- Implemented responsive UI layouts using HTML5, CSS3, JavaScript, and React JS.
- Collaborated in design discussions and suggested UI/UX improvements.
- Managed version control through Git with proper branching strategies.
- Optimized front-end workflows for performance and smooth UX.

ATM Service & Maintenance Workflow Application – Redwood UI Development

- Customized CX extensions and layouts in Visual Builder Studio following Redwood standards.
- Authored TDDs and deployment trackers ensuring compliance.
- Recognized for analytical troubleshooting and maintaining 100% delivery accuracy.
- Contributed to development estimation for multiple Redwood UI entities.

PERSONAL PROJECTS

FitMap – Personalized Fitness Plan Generator *React 19 · Vite 8 · Tailwind CSS v4 · Lucide React · html2pdf.js*

- Built a fully client-side 7-day fitness plan generator using React 19 and Vite 8 with zero backend dependency, selecting and adapting exercises based on user-provided age, weight, available equipment, and fitness goals.
- Architected a 3-step onboarding flow (Profile, Equipment, Goals) using centralized React state management with useState across components organized in a feature-based folder structure.
- Engineered a dynamic plan generation engine that filters exercises by equipment type and goal category (strength, flexibility, core, weight loss), returning a structured 7-day workout array.
- Developed a cursor-proximity animation system with Lucide React SVG icons using mousemove tracking.
- Integrated html2pdf.js for instant client-side PDF export and built a typewriter motivational quote component using setInterval with useEffect cleanup to prevent memory leaks.
- Implemented with real-time form validation (age: 6–100, weight: positive number) and dynamic protein target calculation from body weight.
- Project Demo: Check the live demo here

Developer Dashboard – React + Data Visualization *React JS · Redux Toolkit · GitHub Pages*

- Built a responsive developer dashboard using React JS with interactive charts and data visualization.
- Implemented state management using Redux Toolkit and optimized rendering for better performance.
- Designed reusable modular UI components following component-driven architecture principles.
- Used mock data to simulate real-world metrics with backend-ready architecture.
- Deployed the application using GitHub Pages ensuring production-ready build and accessibility.
- Project Demo: Check the live demo here

EDUCATION

B.Tech in Electronics and Communication Engineering Andhra Loyola Institute of Engineering and Technology, India	2018 – 2022 CGPA: 8.41
--	--------------------------

CERTIFICATIONS

- Microsoft GitHub Copilot (GH-300) – 2025
- Microsoft GitHub Foundations (GH-100) – 2025
- HackerRank – React and Frontend Developer
- Oracle Redwood Application 2024 Certified Developer Associate

RECOGNITIONS

- Received the Infosys Insta Award (Dec 2025) for independently learning Oracle Redwood UI and delivering production-grade features within sprint timelines.
- Honored with the RISE Gracias – Rising Star Appreciation (Nov 2025) for exceptional energy, dedication, and high-quality contributions.
